

Meditech EMR Special Functions

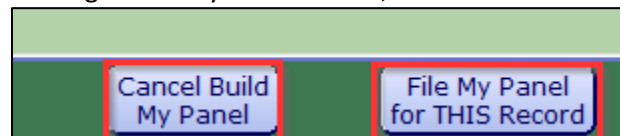

Build your Own Panel under “Special Panels”

This option is used to build a panel that contains only specific data items that YOU want to view. These panels can be for ALL patients (i.e.: blood sugars), or for a SINGLE patient (i.e. WBC for patient with an infection).

1. Navigate to the “Special Panel” Menu in the EMR
2. Click “Build My Panel for All Records” or “Build My Panel for this Record”.

3. Select the data items you want to appear on the My Panel screen.
 - To select the data items, right click on it with the mouse. The background of the item should turn to blue. Repeat this step for all the items you want to appear on the MY Panel Screen.
 - To de-select an item, right click on it with the mouse and the background should turn to grey. Return to other menu.
4. To save the selected data items and build the screen, click on the File My Panel for All Records or for This Record.
 - To cancel the building of the My Panel Screen, click on the Cancel Build My Panel.

5. You can also delete the My Panel screen for This Record by clicking on the Delete My Panel for This Record.
6. You cannot delete the global or Panel For All Records, you can de-select items from the panel
